## Why Dragon uPVC Products

**Dragon uPVC** series are a perfect combination of elegance, modern aesthetics and innovative technology. uPVC is unplasticized (rigid) Poly Vinyl Chloride. With its many favourable features, uPVC windows and doors have been the top choice of many people for over 30 years. Especially in the tropical climate like in the Caribbean, experts and consumers choose Dragon uPVC windows and doors because they are tough, durable and cost effective. Dragon uPVC products offer design flexibility and require little maintenance.

## Why Dragon Thermal Break Aluminium Products

**Thermal Break Aluminium Windows and Doors** are known for their sleek, modern design and durability. The thermal break technology they use enhances energy efficiency by minimizing heat transfer, making them a top choice for energy-conscious homeowners.

**Dragon Thermal Break Aluminium** series with their robust nature and durability have become a popular choice in the Caribbean since 2017. Their slim frames can support larger panes of glass compared to uPVC, making them ideal for shop windows, offices and other commercial spaces. Thanks to thermal break technology, aluminium frames are now a modern, sleek addition to residential homes. They combine the strength and aesthetic appeal of aluminium with enhanced energy efficiency and comfort, making them an excellent choice for contemporary living spaces. The advantages of Dragon Thermal Break Aluminium products include reducing condensation, lowering carbon footprint, enhancing comfort, insulating noise, increasing property value, durability and low maintenance.

## Construction Material & Services Ltd. T/A Dragon Windows

The leading manufacturer and supplier of Dragon uPVC windows, doors, fencing, railing, office cubicles, partitions and other customized innovative products.

Dragon Windows Company also manufactures Thermal Break Aluminium Windows and Doors for middle and high end commercial and residential buildings, helping bring down energy consumption in households and commercial properties by reducing heat dissipation.

## About Dragon Windows Company

**Construction Material & Services Ltd T/A Dragon Windows** was founded in the Commonwealth of Dominica in 2001, specializing in manufacturing top quality uPVC windows, doors, fencing, railing and other innovative custom made products in the plant in Dominica and supply them to the entire Eastern Caribbean markets including the British Virgin Islands, the US Virgin Islands, Anguilla, St. Maarten, St. Kitts and Nevis, Antigua, Guadeloupe, Martinique, St. Lucia, St. Vincent, Barbados and Grenada. Our affiliated company Dragon Q Inc was incorporated in St. Lucia in 2011 and has been supplying the St. Lucian market with variety of top-quality Dragon products via monthly shipped containers.

Dragon Windows Company is devoted to providing cutting edge technology, best quality products and customer-oriented service to the Caribbean. New series are added to our lines of production throughout the years such as aluminium motorized roller shutters and garage doors, stainless steel glass railings, thermal break aluminium windows and doors etc. Our manufacturing centre in Dominica occupies two plants of 15,000 square feet, employs 50 staff and produces 10,000 units of products annually, and exports 15 containers and numbers of breakbulk cargo shipments to the region.

As the leading uPVC and Aluminium product manufacturer in the Caribbean, Dragon Windows Company maintains direct relationships with large-scale manufacturers in China. By eliminating intermediaries, the company can guarantee exceptional quality products that adhere to ISO 9001:2000 accreditations and meet CE (Supplying Europe) standards. Dragon products resisted the devastating power of the two Category-5 super hurricanes: Elmer in the BVI and Maria in Dominica in 2017 and are recognized among our customers as the Hurricane-tested strong windows.
